

Barbara Borini

MULTIMEDIA DESIGN STUDENT (UX/UI) BASED IN AARHUS, DENMARK

barbaraborini.github.io/portfolio linkedin.com/in/barbara-borini borini.barbara@gmail.com 55214857

Analytical Multimedia Design student specializing in scalable UX design systems, advanced Figma prototyping, and frontend architecture. Blending an architectural foundation with full-stack coding knowledge, I create structured, intuitive digital experiences grounded in logic, research, and technical feasibility.

EDUCATION

Multimedia Design

Aarhus Business Academy 2025 - 2027

Specializing in UX/UI design, interactive prototyping, and frontend development. Focused on building scalable Figma design systems using variables and advanced component architecture. Experienced in user research, usability testing, and developing web applications with modern frontend stacks like React, HTML/CSS, and Tailwind.

Introduction to UX/UI Course

ReDi School of Digital Integration Danmark 2024

Hands-on introduction to user-centered design principles, wireframing, interactive prototyping, and user testing methodologies. Developed skills in translating user needs into digital user interface concepts.

Full Stack Development Bootcamp

Soy Henry (Bootcamp) 2022

Intensive 800+ hour training in full-stack web development (JavaScript, React, Node.js, HTML/CSS).

Architecture

National University of Rosario 2019 - 2021

Completed three out of six years of architectural studies, gaining strong foundations in spatial organization, structural hierarchy, grid systems, and complex modular thinking. Developed high attention to spatial layout, detail precision, and design documentation, which directly informs my systemic approach to digital UX design.

PROFESSIONAL EXPERIENCE

Technology & Operations Specialist

Win & Winnow Language Services 2022 - 2024

- Automation & Tools: Architected end-to-end automations in HubSpot, Notion, and Excel, connecting tools to improve cross-functional handoff and operational logic.
- Information Architecture: Managed data clean-up and system migrations, ensuring high-quality data standards.
- User Onboarding & Enablement: Authored system documentation and conducted team training sessions, ensuring smooth adoption of new tools and workflows.
- Website Management & UX: Maintained and updated the company's WordPress site.
- Sales Workflows and Marketing Campaigns: Collaborated with sales/marketing to build automated user journeys and campaigns in HubSpot.
